

" Earth Observation for Social & Environmental Impact "

INTERNSHIP

REMOTE SENSING SPECIALIST (BIOMASS)

COMPANY

Space4Good is an innovative social enterprise utilising earth observation technology for social and environmental impact. Combining remote sensing, GIS and artificial intelligence, we map, analyse and model complex ecosystems and support leading organisations and institutions on topics such as nature-based solutions (NBS) and climate change. By doing so we help impact makers on the ground to make more informed decisions, improve operational efficiency, create data-driven transparency and unlock new revenue sources at scale.

INTERNSHIP GOAL

Use remote sensing data and techniques to perform biomass estimation, including AI-based algorithm development and insight-driven analysis on vegetation dynamics.

RESPONSIBILITIES

You will be helping a technical expert perform a specialized task whose outputs will fit into the wider geo-data pipeline. This starts with a proactive approach to collecting relevant requirements, as well as the actual development of the agreed deliverables. Specifically you will: 1) Utilize satellite imagery and remote sensing techniques to analyze biomass and vegetation dynamics. 2) Process and interpret remote sensing data to derive meaningful insights related to biomass distribution, health, and changes over time. 3) Contribute to the development and refinement of algorithms for accurate biomass estimation using remote sensing data. (AI-based) 4) Maintain detailed documentation of methodologies, workflows, and results for internal reference. You will have great personal freedom in fulfilling these responsibilities and the opportunity to grow into your preferred expert area.

PROFILE

We are looking for somebody who has:

- Strong understanding of remote sensing principles, image analysis, and GIS concepts.
- Proficiency in remote sensing software (e.g., ENVI, QGIS, ArcGIS)
- Preferred programming skills in Python, potentially also in R and JavaScript (Google Earth Engine)
- Excellent analytical and problem-solving skills with a keen interest in environmental issues.
- Effective communication skills and fluent in English
- Current enrollment in a university program (remote sensing, environmental science, geography, or a related field)
- Available for at least 4 months
- Ability to work collaboratively among diverse team members in a remote and in-office environment.
- Genuine passion for Space4Good's mission and topics we work on!

JOIN US!

Space4Good is a certified B. Corp that achieves its mission through a service leadership approach and impact-first principle. We engage with partners and clients with the highest impact potential and have been recognised by many awards such as the Geospatial Top 100 and Meaningful Businesses Top 100. This is a unique opportunity to engage in meaningful professional and personal development within a work environment of trust, initiative, collaboration and customer orientation to tackle the most pressing issues of our environment and society. Sounds like your dream job? Tell us why and attach your CV to careers@space4good.com.

" Earth Observation for Social & Environmental Impact "

INTERNSHIP

PROJECT CONTROLLER ASSISTANT

COMPANY

Space4Good is an innovative social enterprise utilising earth observation technology for social and environmental impact. Combining remote sensing, GIS and artificial intelligence, we map, analyse and model complex ecosystems and support leading organisations and institutions on topics such as nature-based solutions (NBS) and climate change. By doing so we help impact makers on the ground to make more informed decisions, improve operational efficiency, create data-driven transparency and unlock new revenue sources at scale.

INTERNSHIP GOAL

Assist in administrative project reporting (incl. grants) and gain first-hand understanding/experience in evolving our project control and delivery processes in a dynamic scale-up.

RESPONSIBILITIES

You will be helping our project controller perform consistent project reporting, and project operations tasks whose outputs will fit into the wider company project management structures, tools and processes. This starts with a proactive approach to collecting relevant requirements, as well as the actual development of the agreed deliverables. Tasks may include: (1) Support the maintenance of compliant reporting for public subsidies (2) Assist (and scale-up) new business operations to improve project control processes (3) Contribute to the general day-to-day reporting of projects and business performance. You will have great personal freedom in fulfilling these responsibilities, suggest new approaches and ideas, as well as have the opportunity to grow into your preferred expert area and role. **This role is ideal for a candidate who is capable of adapting to the flexing needs of a dynamic scale-up and enjoys being challenged on a regular basis.**

PROFILE

We are looking for somebody who has:

- Experience or university enrollment in business/project mgmt, accounting, innovation program or related field.
- **Bonus:** previous work experience & applied skills in a small local business or start-up/scale-up
- Strong skills in Excel and comfort with financial calculation and planning
- Excellent communication, analytic, and administrative skills
- Ability and mindset to multitask while being detail oriented in a complex, interconnected team environment
- Plus experience with: agile/scrum methodologies, grants and subsidy schemes, innovation management
- Fluent in English, preferably Dutch
- Available for at least 4 months
- Ability to work collaboratively among diverse team members in a remote and in-office environment.
- Genuine passion for Space4Good's mission and topics we work on!
