

*"Earth Observation for Social & Environmental Impact"*

**Project Manager**  
*Full-Time (on-site/hybrid)*

## COMPANY

Space4Good is an innovative social enterprise utilising earth observation technology for social and environmental impact. Combining remote sensing, GIS and artificial intelligence, we map, analyse and model complex ecosystems and support leading organisations and institutions on topics such as nature-based solutions (NBS) and climate change. By doing so we help impact makers on the ground to make more informed decisions, improve operational efficiency, create data-driven transparency and unlock new revenue sources at scale.

## ROLE & RESPONSIBILITIES

We are looking for an **experienced project manager** who will ensure great **project relationships** and **outcomes** for our clients/partners and **smooth executions** for the internal team. Your responsibilities will be both **strategic and operational**. You will support **project selection** and **roadmap strategy**, refine, implement and ensure internal and external **project management structures, tools and processes**, oversee the **project pipeline**, and of course **monitor and manage progress and resource allocation** over all projects in an agile project environment. This includes ownership or involvement in **contracts, requirement analysis, planning & scheduling, administration, documentation, coordination and client communication** on time, quality and budget aligned with the processes and structures you created, lead and ensure. As a project manager at Space4Good you will be directly contributing to meaningful topics such as **deforestation prediction, afforestation detection, biomass monitoring and biodiversity assessment** with clients such as Ecosia, Rabobank, Euronatur, Barry Callebaut and the European Space Agency. Accordingly, you will have a **great impact on our clients, our team and Space4Good** at large, allowing us to support more impact leaders with data, insights and awesome maps!

## PROFILE

We are looking for somebody who has:

- 2+ years of project management experience in technical or scientific domains with multiple, simultaneous projects
- Excellent planning, communication and coordination skills
- Ability and mindset to multitask while being detail oriented in a complex, interconnected team environment
- Applied experience with project management tools as well as agile/scrum methodologies and risk management
- Fluent in English
- Preferably experience in the geospatial sector and/or forestry & restorative agriculture
- Available on a full-time basis working regularly from our office in The Hague
- Genuine passion for Space4Good's mission and topics we work on!

## JOIN US!

Space4Good is a certified B. Corp that achieves its mission through a service leadership approach and impact-first principle. We engage with partners and clients with the highest impact potential and have been recognised by many awards such as the Geospatial Top 100 and Meaningful Businesses Top 100. This is a unique opportunity to engage in meaningful professional and personal development within a work environment of trust, initiative, collaboration and customer orientation to tackle the most pressing issues of our environment and society.
